### 1988 Mazda RX7 88 Convertible No Spark From Coils

With the 1980 model RX-7 the electronic components were located in a separate box, while the 1981-85 RX-7 models' electronics were mounted on the distributor housing. Aside from simplifying the ignition, this change has eliminated a major problem we have seen in the earlier 1980 ignition system - a tendency to "cross trigger" between the ...

Primary wire is typically an 18-gauge wire and is the most common wire found in wiring harnesses. The larger wires that feed heavy-draw circuits are typically 14- to 12-gauge. The wire in Painless Performance kits runs a little larger than the standard; the primary wires are 16-gauge, with 12-gauge for heavy-draw items such as the headlights.
