On exploring the oceans - Robert Ballard | TED-Ed

For the first time, anyone can explore from the surface to the ocean floor. Along with parallel "atomic elements" for land and coastal regions, we now have a kind of periodic table for ecosystems. It enables us to analyze, map, predict and intervene into the emergent life of land, ocean, freshwater and the planet as a whole, marking a major step in the evolution of a new "hard" science — the science of ecosystems.
