"This textbook covers all the theory and technology sections that students need to learn in order to pass level 1, 2 and 3 automotive courses from the Institute of Motor Industry, City & Guilds and other exam boards. It has been produced in partnership with ATT Training and is a companion to their online learning resources. Learning is made more enjoyable and effective as the topics in the book are supported with online activities, video footage, assessments and further reading. If you are using ATT Training materials then this is the ideal textbook for your course"--

The VW Super Beetle was a different beast from the very simple original Beetle. McPherson struts at the front and semi-trailing arms at the rear were more sophisticated than the older car and a bigger engine gave it more performance. Long ignored by most restorers, it is becoming more desirable as the stocks of older cars are restored or rust away. This book tells you how to restore a Super Beetle to clean, roadworthy condition with minor modifications to improve performance and handling. It describes a detailed build-up from paint and body to interior and mechanical parts. It is an invaluable guide for any Super Beetle owner or restorer.
