nigrum were determined.

The sample

Munthirimunda fruit has high moisture content.

The sample Chengannor leaf has high dry matter content. The sample

Chenganoor leaf has high crude protein content.

The sample Panniyor leaf has high crude fibre

content. Ether Extract is high in sample

Chenganoor leaf. The

Online Library

Black Pepper

sample Munthirimunda leaf has high comparatively high Total Ash content. Gross Energy is high in sample Panniyor fruit. A wide gap in the nutritional properties of Piper nigrum varieties exist in Kerala which could be further explored.

This book considers all aspects of black pepper

Online Library

Black Pepper

from its growth, as a flowering vine, to how the dried fruit (peppercorn) is used as a spice and traded as a commodity. It is the economic mainstay of several India states and, principally, in Kerala State, with the Indian subcontinent being the largest black pepper producer. Indonesia has also emerged as a large

Online Library

Black Pepper

producer of black pepper. Black pepper commands a leading position among the spices and has an immense commercial importance to world trade, finding its way onto the dining table of millions around the world, on the European and North American continents, and Japan. The use of black pepper

Online Library

Black Pepper

By P N Ravindran

ranges from a simple dietary component and flavour enhancer, to that of a spice with huge pharmacological benefits.

Black Pepper is the first monograph on this important and most widely used spice. This volume includes chapters on all aspects of the crops' botany; crop improvement,

Online Library

Black Pepper

time to come.

Ravindran

Known as the "King" of spices, black pepper (*Piper nigrum* L.) and the "Queen" of spices, cardamom (*Elettaria cardamomum* M.), both perennial crops of the tropics, are the most important and most widely sought after spice crops of the world. They both have many uses, for

Online Library

Black Pepper

example, both are used as flavourings and as a medicine. This book provides a comprehensive review of these two very important spice crops, covering origin, history, geographical distribution, production, economy and their uses. Discusses the two major spices of great economic value to the developing

Online Library

Black Pepper

By P N Ravindran
The author is an eminent scientist who has won numerous awards for his work in this area

Spices are high value, export-oriented crops used extensively in food and beverage flavourings, medicines, cosmetics and perfumes. Interest is growing however in the theoretical and practical aspects of the

Online Library

Black Pepper

biosynthetic mechanisms of active components in spices as well as the relationship between the biological activity and chemical structure of these secondary metabolites. A wide variety of phenolic substances and amides derived from spices have been found to possess potent chemopreventive, anti-mutagenic, anti-

Online Library

Black Pepper

oxidant and anti-carcinogenic properties. Representing the first discussion of the chemical properties of a wide cross section of important spices, this book covers extensively the three broad categories of plant-derived natural products: the terpenoids, the alkaloids and the phenyl propanoids and allied

Online Library

Black Pepper

phenolic compounds.

Spice crops such as black pepper, ginger, turmeric and coriander are covered with information on botany, composition, uses, chemistry, international specifications and the properties of a broad range of common and uncommon spices.

The Encyclopedia of

Page 47/58

Online Library

Black Pepper

Herbs and Spices

provides comprehensive coverage of the

taxonomy, botany, chemistry, functional properties, medicinal uses, culinary uses and safety issues relating to over 250 species of herbs and spices. These herbs and spices constitute an important agricultural commodity; many are traded globally and are

Online Library

Black Pepper

indispensable for pharmaceuticals, flavouring foods and beverages, and in the perfumery and cosmetic industries. More recently, they are increasingly being identified as having high nutraceutical potential and important value in human healthcare. This encyclopedia is an excellent resource for

Online Library

Black Pepper

researchers, students, growers and manufacturers, in the fields of horticulture, agriculture, botany, crop sciences, food science and pharmacognosy.

Herbs and spices are among the most versatile and widely used ingredients in food processing. As well as their traditional role in

Online Library

Black Pepper

flavouring and colouring foods, they have been increasingly used as natural preservatives and for their potential health-promoting properties, for example as antioxidants. Edited by a leading authority in the field, and with a distinguished international team of contributors, the Handbook of herbs and spices provides an

Online Library

Black Pepper

essential reference for manufacturers wishing to make the most of these important ingredients.

The first group of chapters looks at general issues including quality indices for conventional and organically produced herbs, spices and their essential oils.

The main body of the handbook consists of over twenty chapters

Online Library

Black Pepper

By P N Ravindran

covering key spices and herbs from aniseed, bay leaves and black pepper to saffron, tamarind and turmeric. Each chapter covers key issues from definition and classification including: chemical structure cultivation post-harvest processing uses in food processing functional properties quality indices methods of analysis The

Online Library

Black Pepper

Handbook of herbs and spices is a standard reference for all manufacturers using herbs and spices in their products.

Plant Sciences Reviews 2010 provides scientists and students in the field with timely analysis on key topics in current research. Originally published online in CAB
