The Briggs & Stratton 190cc 675 Series Push Mower Engine produces 6.75 ft.-lbs. Gross Torque. The 675 Series Engine is the more powerful version of the standard 650 Engine that Briggs and Stratton usually uses. It has a similar design as the 650, so if you are looking for repair guides to a 650 engine, these will work just as well.

Repair - iFixit

The Briggs and Stratton 675 Series is the type of lawnmower you call in when others can't get the job done. To speak in mob terms, the weaker engines would be Ray Liotta, while the 675 Series would be Joe Pesci. He'll smack the mouthy weeds on the head, throw them in the trunk and they'll never be seen again.

Mower Parts & Accessories - eBay  
One of these mowers uses a  
Briggs & Stratton 190cc 675ex  
Series engine. I wanted to know  
how many horsepower the engine  
is, but it's not in the specs. I went  
to a website that sells this engine,  
and it says: Rated Power (HP):  
Manufacturer no longer rates this  
engine by HP. Apparently it has  
6.75 ft/lbs torque.
