Dying Well is my practical and down-to-earth guide on how to approach the final years, months and days of one's life. I focus in particular on the medieval documents called ars moriendi — drawing on old wisdom to relearn the the art of dying well and dying faithfully.

Dying Well - John Wyatt
"A common sense path to define what a 'good' death looks like" (USA TODAY), The Art of Dying Well is about living as well as possible for as long as possible and adapting successfully to change. Packed with extraordinarily helpful insights and inspiring true stories, award-winning journalist Katy Butler shows how to thrive in later life (even when coping with a chronic medical condition), how to get the best from our health system, and how to make your own "good death" more likely. Butler explains how to successfully age in place, why to pick a younger doctor and how to have an honest conversation with them, when not to call 911, and how to make your death a sacred rite of passage rather than a medical event. This handbook of preparations—practical, communal, physical, and spiritual—will help you make the most of your remaining time, be it decades, years, or months. Based on Butler's experience caring for aging parents, and hundreds of interviews with people who have successfully navigated our fragmented health system and helped their loved ones have good deaths, The Art of Dying Well also draws on the expertise of national leaders in family medicine, palliative care, geriatrics, oncology, and hospice. This "empowering guide clearly outlines the steps necessary to prepare for a beautiful death without fear" (Sheff Awareness).

Attitudes to death and dying are changing in the United States. Today, we are living longer, yet with the acute awareness that what we do now will affect our remaining time. Prompted by a big push from baby boomers, our society is moving towards a culture that provides a greater array of positive choices in the final phase of our lives. This should inspire all of us to find new ways to create joy and comfort until the very last moment of life. Written by Social Sciences Professor Dr. Judy Stevens-Long, author of the bestselling book Adult Life, with Dr. Dohrea Bardell, a Fellow at the Institute for Social Innovation, this book contains all the information you need to ensure that the last years of your life, or the life of someone you love, will be as satisfying, comfortable, and as productive as possible.

In the first century BC, Marcus Tullius Cicero, orator, statesman, and defender of republican values, created these philosophical treatises on such diverse topics as friendship, religion, death, fate and scientific inquiry. A pragmatist at heart, Cicero's philosophies were frequently personal and ethical, drawn not from abstract reasoning but through careful observation of the world. The resulting works remind us of the importance of social ties, the questions of free will, and the justification of any creative endeavour. This lively, lucid new translation from Thomas Habinek, editor of Classical Antiquity and the Classics and Contemporary Thought book series, makes Cicero's influential ideas accessible to every reader.

A Columbia University physician comes across a popular medieval text on dying well written after the horror of the Black Plague and discovers ancient wisdom for rethinking death and gaining insight today on how we can learn the lost art of dying well in this wise, clear-eyed book that is as compelling and soulful as Being Mortal, When Breath Becomes Air, and Smoke Gets in Your Eyes. As a specialist in both medical ethics and the treatment of older patients, Dr. L. S. Dugdale knows a great deal about the end of life. Far too many of us die poorly, she argues. Our culture has overly medicalized death: dying is often institutional and sterile, prolonged by unnecessary resuscitations and other intrusive interventions. We are not going gently into that good night—our reliance on modern medicine can actually prolong suffering and strip us of our dignity. Yet our lives do not have to end this way. Centuries ago, in the wake of the Black Plague, a text was published offering advice to help the living prepare for a good death. Written during the late Middle Ages, ars moriendi—The Art of Dying—made clear that to die well, one first had to live well and described what practices best help us prepare. When Dugdale discovered this Medieval book, it was a revelation. Inspired by its holistic approach to the final stage we must all one day face, she draws from this forgotten work, combining its wisdom with the knowledge she has gleaned from her long medical career. The Lost Art of Dying is a twenty-first century ars moriendi, filled with much-needed insight and thoughtful guidance that will change our perceptions. By recovering our sense of finitude, confronting our fears, accepting how our bodies age, developing meaningful rituals, and involving our communities in end-of-life care, we can discover what it means to both live and die well. And like the original ars moriendi, The Lost Art of Dying includes nine black-and-white drawings from artist Michael W. Dugger. Dr. Dugdale offers a hopeful perspective on death and dying as she shows us how to adapt the wisdom from the past to our lives today. The Lost Art of Dying is a vital, affecting book that reconsiders death, death culture, and how we can transform how we live each day, including our last.

John Wyatt examines the "art of dying," a Christian tradition from the past. We see opportunities for dying well and faithfully, real-world examples of personal growth, and instances of reconciliation and personal healing in relationships. This is a book for those who are facing death as well as their relatives, friends, and caretakers.

This book explores the Care Trust concept promoted by central government for improving partnership working between health and social care. Using case studies and examples to raise current issues related to partnership working it explains how Care Trusts are bridging the gap between health and social care and considers how they are delivering more co-ordinated services and improved outcomes. All healthcare and social care professionals with responsibility for involved in or affected by the new partnership working arrangements will find this book useful reading.

A book of beauty, hope and dignity that can be given to anyone - at any stage. Advises and reassures people who are facing death, and their friends, families and carers. Charts pathways from fear to courage, loss to discovery and from denial to insight. Inspires with moving and powerful quotations from major religions and cultures. Offers complementary therapies such as massage, aromatherapy and shiatsu.

"How can you take the fear of death and turn it into something profound, something positive? What is the alchemy that allows someone who is in a metaphorical desert to turn around and see a flower?"—Tina L. Staley "Death—the last sleep? No, it is the final awakening."—Sir Walter Scott Most of us try to avoid thinking about death until the moment we come face-to-face with it. But when we have the courage to accept our inevitable mortality—and even to contemplate it actively, as a spiritual practice—we open the door to living fully, joyfully, and in complete presence. Living Fully, Dying Well is an investigation into the challenge each of us faces—to embrace all of life, from the beginning to the end. When death approaches, many of us undergo a profound transformation—we let go of old distractions and focus with new clarity on what gives our life meaning. Yet we can invite these profound "deathbed revelations" at any point in our lives by engaging in an honest inquiry into our own mortality. Living Fully, Dying Well provides a doorway to begin your own exploration of the mysteries of death—from the cultural myths about dying, to the personal fears we all share, to the question of what becomes of us beyond this life. Living Fully, Dying Well unfolds as a dialogue between spiritual leaders and medical healers, each of whom brings their own unique perspective to the universal human experience of death. These luminaries offer their stories, their insights, and their most valuable practices, all to transform death from a source of fear to an opportunity to reveal the true richness of your life. Living Fully, Dying Well has received the following awards: 2010 Gold Independent Publishers Award (IPPY)—Aging/Death & Dying 2010 Gold Nautilus Award—Grieving/Death & Dying 2010 Gold Living Now Award—Grieving/Death & Dying

Living and Dying Well takes an informed, interdisciplinary approach to the problems, data, theory, and procedures that a just society must consider when establishing policies regarding human life and death. Leading psychologist Lewis Petrinoich expands on the controversial arguments developed in his earlier work, Human Evolution, Reproduction, and Morality, and considers such contemporary issues as: the morality of human genetic screening and of the Human Genome Project; organ transplants; the allowance of suicide and euthanasia; and physicians assisting in the dying process.
