Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

"Writing allows each of us to live with that special wide-awakeness that comes from knowing that our lives and our ideas are worth writing about." -Lucy Calkins Teaching Writing is Lucy Calkins at her best-a distillation of the work that's placed Lucy and her colleagues at the forefront of the teaching of writing for over thirty years. This book promises to inspire teachers to teach with renewed passion and power and to invigorate the entire school day. This is a book for readers who want an introduction to the writing workshop, and for those who've lived and breathed this work for decades. Although Lucy addresses the familiar topics-the writing process, conferring, kinds of writing, and writing assessment- she helps us see those topics with new eyes. She clears away the debris to show us the teeny details, and she shows us the majesty and meaning, too, in these simple yet powerful teaching acts. Download a sample chapter for more information.

Updated and revised edition As every student quickly learns, merely sitting through a class and paying attention is usually not sufficient to ensure good grades. The proper taking of good notes is essential. Note-Taking Made Easy tells why the student should take his or her own notes (rather than buying them or taping lectures), and tells exactly how to determine what is worth noting, whether during a lecture, classroom discussion, even from a book or during a meeting. The authors describe the two most successful methods of organizing notes—outlining and patterning—and provide shortcuts to really make note-taking easy, from shorthand devices to abbreviations. Special sections are devoted to taking notes from texts, fiction as well as nonfiction, and handling charts, graphs, and photos. A final chapter shows how to tie together notes from various sources. This STUDY SMART reference guide series, designed for students from junior high school through lifelong learning programs, teaches skills for research and note-taking, presents strategies for test-taking and studying, provides exercises to improve spelling, grammar, and vocabulary, and reveals secrets for putting these skills together in great essays.

Thirteen-year-old Brian Robeson, haunted by his secret knowledge of his mother's infidelity, is traveling by single-engine plane to visit his father for the first time since the divorce. When the plane crashes, killing the pilot, the sole survivor is Brian. He is alone in the Canadian wilderness with nothing but his clothing, a tattered windbreaker, and the hatchet his mother had given him as a present. At first consumed by despair and self-pity, Brian slowly learns survival skills—how to make a shelter for himself, how to hunt and fish and forage for food, how to make a fire—and even finds the courage to start over from scratch when a tornado ravages his campsite. When Brian is finally rescued after fifty-four days in the wild, he emerges from his ordeal with new patience and maturity, and a greater understanding of himself and his parents.
