Nelson Goodman's disparate writings are often written about only within their own particular discipline, such that the epistemology is discussed in contrast to others' epistemology, the aesthetics is contrasted with more traditional aesthetics, and the ontology and logic is viewed in contrast to both other contemporary philosophers and to Goodman's historical predecessors. This book argues that that is not an adequate way to view Goodman. The separate disciplines of ontology, epistemology, and aesthetics should be viewed as sequential steps within his thought, such that each provides

the ground rules for the next section and, furthermore, providing the reasons for limitations on the terms available to the subsequent writing(s). This is true not merely because this is the general chronology of his writing, but more importantly because within his metaphysics lies Goodman's basic nominalist ontology and logic, and it is upon those principles that he builds his epistemology and, furthermore, it is the sum of both the metaphysics and the epistemology, with the nominalist principle as the guiding force, which constructs the aesthetics. At the end of each section of this book, the consequent limitations imposed on his terms and concepts available to him are explicated, such that, by the end of the book, the book delineates the constraints imposed upon the aesthetics by both the metaphysics

and the epistemology. This book will benefit not only the professionals in the field of philosophy, but will also help both graduate and upper level undergraduate students understand Goodman's disparate writings within their proper context, and hopefully will also encourage them to view philosophical thinking in a less truncated and departmentalized way.

German writer, critic, and theorist Paul Scheerbarth (1863-1915) died nearly a century ago, but his influence is still being felt today. Considered by some a mad eccentric and by others a visionary political thinker in his own time, he is now experiencing a revival thanks to a new generation of scholars who are rightfully situating him in the modernist pantheon. Glass! Love!! Perpetual Motion!!! is the first

collection of Scheerbart's multifarious writings to be published in English. In addition to a selection of his fantastical short stories, it includes the influential architectural manifesto Glass Architecture and his literary tour-de-force Perpetual Motion: The Story of an Invention. The latter, written in the guise of a scientific work (complete with technical diagrams), was taken as such when first published but in reality is a fiction—albeit one with an important message. Glass! Love!! Perpetual Motion!!! is richly illustrated with period material, much of it never before reproduced, including a selection of artwork by Paul Scheerbart himself. Accompanying this original material is a selection of essays by scholars, novelists, and filmmakers commissioned for this publication to illuminate Scheerbart's importance,

then and now, in the worlds of art, architecture, and culture. Coedited by artist Josiah McElheny and Christine Burgin, with new artwork created for this publication by McElheny, *Glass! Love!! Perpetual Motion!!!* is a long-overdue monument to a modern master.

When a frightening ordeal turns her life upside down, Darcy reaches out to her friends for help, but discovers that one of them has an even bigger secret.

Emma Bell Miles (1879–1919) was a gifted writer, poet, naturalist, and artist with a keen perspective on Appalachian life and culture. She and her husband Frank lived on Walden's Ridge in southeast Tennessee, where they struggled to raise a family in the difficult mountain environment.

Between 1908 and 1918, Miles kept a series of journals in which she recorded in beautiful and haunting prose the natural wonders and local customs of Walden's Ridge. Jobs were scarce, however, and as the family's financial situation deteriorated, Miles began to sell literary works and paintings to make ends meet. Her short stories appeared in national magazines such as Harper's Monthly and Lippincott's, and in 1905 she published *Spirit of the Mountains*, a nonfiction book about southern Appalachia. After the death of her three-year-old son from scarlet fever in 1913, the journals took a more somber turn as Miles documented the difficulties of mountain life, the plight of women in rural communities, the effect of disparities of class and wealth, and her own struggle with tuberculosis.

Previously examined only by a handful of scholars, the journals contain both poignant and incisive accounts of nature and a woman's perspective on love and marriage, death customs, child raising, medical care, and subsistence on the land in southern Appalachia in the early twentieth century. With a foreword by Elizabeth S. D. Engelhardt, this edited selection of Emma Bell Miles's journals is illustrated with examples of her painting.

A major barrier to the introduction of ferroelectric devices into mass markets remains their limited reliability due to fatigue. The underlying physical and chemical mechanisms of this material fatigue phenomenon are extremely complex, and the relevant influences range from single-point defects to macroscopic boundary conditions. This book summarizes the different aspects of fatigue in ferroelectrics. It is primarily concerned with bulk material effects. Mechanical, electrical, and physico-chemical processes are described; reference data are given for different loading regimes and boundary conditions; and various fatigue models are compared. The monograph also demonstrates

how the results of acoustic emission and of microscopy studies reveal the microscopic origins of fatigue in ferroelectric devices.

A memory of love... On her return to the present from a time-travel journey to sixteenth-century Calais, France, college co-ed Arielle Lloyd anticipates a joyful welcome from her immortal fiance, Sebastian Gaulle. She is stunned to discover that he doesn't remember their time together there and wonders, has she lost him forever? Danger from afar... As Sebastian tries to shake loose his disturbing memories and solve the enigma of Arielle's haunting eyes, the Russian Mafia ups the stakes in their deadly game to steal crucial documents from his company. Then an envelope arrives with photos of

Arielle. The message is clear: if Sebastian fails to meet their demands, his love will pay the price with her life. A love across all time... Sebastian and his associates join forces with Interpol in a race to thwart the Russians' plans. In the global battle, the Russians have made a serious mistake. They have threatened the beloved of an indestructible immortal, a woman Sebastian only now realizes he has loved across the centuries."

Sixteen-year-old Hope must defend her developmentally disabled brother (who has not spoken a word since he was 7 years old) when he is accused of murdering a beloved high school baseball coach.
