Introduced in 1989 in the campaign to repel the Japanese 4x4 invasion, the Discovery opened up a whole new market for Land Rover, creating its own niche halfway between the traditional rough and ready Land Rover off-roader and the upmarket Range Rover cruiser. Its reputation as a rugged workhorse both on and off-road has ensured that the Discovery has remained one of the worlds best-selling 4x4s since its introduction. This all-color book - part of Haynes best-selling You & Your series that includes the well-received Land Rover Ninety, One Ten & Defender - will fascinate all Discovery owners and enthusiasts.

Cancer is one of the leading killers in the world and the incidence is increasing, but most cancer patients and cancer survivors suffer much from the disease and its conventional treatments' side effects. In the past, clinical data showed that some complementary and alternative medicine (CAM) possessed anticancer abilities, but some clinicians and scientists have queried about the scientific validity of CAM due to the lack of scientific evidence. There is great demand in narrowing the knowledge gap to explore the scientific and evidence-based knowledge of CAM in the anticancer field. With this aim, an unparalleled undertaking of a book series is launched to structurally consolidate this area. Although acupuncture and moxibustion have been practiced for millennia, they have come under scientific investigation only recently. Acupuncture and moxibustion have been used clinically to treat cancer-related symptoms (e.g. cancer pain, anxiety, depression and insomnia), manage treatment-induced side effects (e.g. hot flashes, nausea and vomiting) and enhance immunity (e.g. blood cell count, lymphocyte and natural killer cell activity). This is the first book manages to provide comprehensive and updated scientific evidence of the effectiveness of acupuncture and moxibustion intervention for cancer care. Laboratory and animal studies have uncovered the mechanisms of acupuncture and moxibustion for cancer therapy. Promising results of most clinical trials show the efficacy and safety of acupuncture and moxibustion in cancer management. This book consists of fifteen chapters which address a range of important aspects that will impact on the application of acupuncture and moxibustion. An overview of the safety and side effects of acupuncture and moxibustion for cancer care are also covered. In addition, the integration of acupuncture with Western medicine in cancer treatment and recent clinical trials are included as well. Opinion leaders around the world have teamed up to pursue a thorough and up-to-date review of the area, this volume will contribute great to the cancer, clinical and academic community by providing evidence-based information on the efficacy of acupuncture and moxibustion as an anticancer therapy.
