"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and

fortunes would not be uninteresting to the public." -an excerpt

Strategic health planning, the cornerstone of initiatives designed to achieve health improvement goals around the world, requires an understanding of the comparative burden of diseases and injuries, their corresponding risk factors and the likely effects of intervention options. The Global Burden of Disease framework, originally published in 1990, has been widely adopted as the preferred method for health accounting and has become the standard to guide the setting of health research priorities. This publication sets out an updated assessment of the situation, with an analysis of trends observed since 1990 and a chapter on the sensitivity of GBD estimates to various sources of uncertainty in methods and data.

This series is devoted to the publication of monographs, lecture resp. seminar notes, and other materials arising from programs of the OSU Mathematical Research Institute. This includes proceedings of conferences or workshops held at the Institute, and other mathematical writings.

After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job

and confines herself in her family home. One day, she meets her brother's best friend , and her soul makes a first step to healing.

Better than fireworks, this classic Beginner Book edited by Dr. Seuss celebrates all the wonderful things that come with summer! From trips to the beach and eating watermelon to fireworks and fishing, Alice Low and Roy McKie's Summer will have young readers eager for the kind of fun only warm breezes and sunny weather can bring. Originally created by Dr. Seuss, Beginner Books encourage children to read all by themselves, with simple words and illustrations that give clues to their meaning.

"One icy winter's evening in Budapest, a man runs straight into John Taylor as he walks home through the narrow streets. John falls over into the snow and looks up at the man's face. 'I felt very afraid. Because what I saw was me. My face looking down at me. My mouth saying sorry.' Who is the man, and how will John's life change?

In *Songwriting For Geniuses*, singer/songwriter Gene Burnett offers 25 tips to aspiring songwriters for writing better, more satisfying songs. The author's contention is that within each of us is a place that knows when a song works and when

it does not. This place of knowing is called many things: intuition, spirit, the unconscious. Burnett calls it your "genius," and it is to this inner genius that this book is addressed. A song that works, claims Burnett, is one that releases a "charge," first for the writer and then for the listener. With Burnett's simple and practical tips, you will learn to recognize this release as a guiding and shaping force in the songwriting process.

Stuart Nicholson's biography of Ella Fitzgerald is considered a classic in jazz literature. Drawing on original documents, interviews, and new information, Nicholson draws a complete picture of Fitzgerald's professional and personal life. Fitzgerald rose from being a pop singer with chart-novelty hits in the late '30s to become a bandleader and then one of the greatest interpreters of American popular song. Along with Billie Holiday, she virtually defined the female voice in jazz, and countless others followed in her wake and acknowledged her enormous influence. Also includes two 8-page inserts.
