With characteristic wit, lucidity, and insight, Pinker argues that the dogma that the mind has no innate traits-a doctrine held by many intellectuals during the past century-denies our common humanity and our individual preferences, replaces objective analyses of social problems with feel-good slogans, and distorts our understanding of politics, violence, parenting, and the arts. Being Human begins by describing some of the major philosophical accounts of human nature, from Ancient Greek philosophers, such as Plato and Aristotle, to major British and Continental philosophers, such as Locke and Nietzsche. The book considers religious accounts of human nature, with their focus on the nature of good and evil, and scientific accounts of genetics and the brain, which underpin the distinctively human cognitive ability of language. Attention then turns to the ideas of the behaviourists, such as Skinner, Freud, and other psychodynamic psychologists, and humanistic-phenomenological psychologists, such as
