On the overarching accounting concepts that require consistent reiteration throughout the course. With a clear understanding of the concepts, you are then ready to experience the second section--Accounting Applications. Here you practice the application of accounting procedures with features like Apply It and a new transaction analysis model, which clearly illustrates how transactions are the result of business decisions and recorded in a way to show their effects on the financial statements. Finally, you utilize section three, Business Applications. This section illustrates how the concepts and procedures are used to make business decisions. Real company examples are used throughout the chapter to show students the relevance of the material. This logical progression through the

Orientation, incorporate new instructional strategies, develop students' core skills and competencies, or integrate technology into the classroom, the 2002e edition provides a total solution. Because most students taking the introductory accounting course are business majors, the new edition focuses on the business relevance of accounting, emphasizing decision making and analysis. The integrated text and technology program allows students and instructors to take advantage of opportunities created by new instructional technologies. New co-author Susan Crosson, coordinator of the accounting department at Santa Fe Community College and chair of the Two-Year College Section of the American Accounting Association, enhances the text with her expertise in

Understanding the main concepts of IFRS Standards The fourth edition of Applying IFRS Standards explains the core principles of International Financial Reporting (IFRS) Standards. It also addresses the skills needed to apply the standards in business environments. The book begins with an overview of the International Accounting Standards Board (IASB) and how it establishes accounting standards. The general book topics are then covered in detail and include: income taxes, financial instruments, fair value measurement, property, inventories, employee benefits and more. Discussion questions, exercises
