Emphasizing why statistical techniques are essential tools for bioscientists, Biomeasurement removes the stigma attached to statistics by giving students the confidence to use key techniques for themselves. Placing the role of data analysis in the context of the wider scientific method and introducing students to key terms and common statistical concepts, the text demonstrates the power and importance of statistics throughout the study of bioscience.

Includes 8 practice tests (5 online and 3 in the book); accompanying DVD includes instruction and tips.

This book is showcases recent advances in knowledge discovery enhanced with semantic and social information. It includes eight chapters that grew out of joint workshops at ECML/PKDD 2007. The contributions emphasize the vision of the Web as a social medium.

From geometric and numerical patterns to graphing non-linear figures, 50 reproducible activities make pre-algebra less intimidating by exploring why formulas work rather than just having students memorize them. Students work individually or in groups on lessons covering variables, numerical relationships, equations, and patterns. Teacher pages give you objectives, prerequisite lessons, materials needed, and procedures for each activity.

Offering a student-focused introduction to the use of statistics in the study of the biosciences, this text looks at statistical techniques and other essential tools for bioscientists, giving students the confidence to use and further explore the key techniques for themselves.

Make math matter to students in grades 6 and up using Algebra: Daily Skill Builders! Activities become more challenging as students build upon what they have learned. The book is perfect for review and practice and supports NCTM standards.

This book constitutes the refereed proceedings of the joint 6th International Semantic Web Conference, ISWC 2007, and the 2nd Asian Semantic Web Conference, ASWC 2007, held in Busan, Korea, in November 2007. The 50 revised full academic papers and 12 revised application papers presented together with 5 Semantic Web Challenge papers and 12 selected doctoral consortium articles were carefully reviewed and selected from a total of 257 submitted papers to the academic track and 29 to the applications track. The papers address all current issues in the field of the semantic Web, ranging from theoretical and foundational aspects to various applied topics such as management of semantic Web data, ontologies, semantic Web architecture, social semantic Web, as well as applications of the semantic Web. Short descriptions of the top five winning applications submitted to the Semantic Web Challenge competition conclude the volume.

Make algebra equations easy for students in grades 6 and up using Jumpstarters for Pre-Algebra: Short Daily Warm-Ups for the Classroom. This 48-page resource covers addition, subtraction, multiplication, division, fractions, decimals, math stories, number sense, place value, geometry, algebra, and measurement. The book includes five warm-ups per reproducible page, answer keys, and suggestions for use.
