Capability Maturity Framework (IT-CMF) "The challenge is to characterize how an IT investment, for new capabilities or for "keeping the lights on," helps the business that bears the cost to achieve its financial performance targets and business objectives." Harris, Herron & Iwanicki, "The Business Value of IT," page 15.

IT Capability Maturity Framework Introduction to IT-CMF

The Capability Maturity Model is a development model created in 1986 after a study of data collected from organizations that contracted with the U.S. Department of Defense, who funded the research. The term "maturity" relates to the degree of formality and optimization of processes, from ad hoc practices, to formally defined steps, to managed result metrics, to active optimization of the processes. The model's aim is to improve existing software development processes, but it can also be applied
