The Pleistocene of Ceylon | National Library of Australia

Based on that important thesis his book The Pleistocene of Ceylon was published by the Department of National Museums in 1958 (P.E.P. Deraniyagala (1958), The Pleistocene of Ceylon, Natural History Series, Ceylon National Museum, Ceylon). According to him this epoch would have been from 1.8 million years to 12,000-10,000 years ago.

P. E. P. Deraniyagala Archives - Sri Lanka Archaeology

At 65,610 km² Sri Lanka is one of the large islands in the Indian Ocean and during the Pleistocene epoch studies have shown that the island was joined to the mainland of the Indian Subcontinent. Due to the cold temperatures of this epoch the scattered glaciers caused the water level to fall and thus much of the places under water today was land during this time. Due to the drop in sea levels ...
