Addressing climate change will require many solutions—there's no magic bullet. Yet nearly all of these solutions exist today, and many of them hinge on humans changing the way we behave ...

Global warming solutions, facts and information

Some of the most promising ways to mitigate climate change are what we call “natural climate solutions”: the conservation, restoration, and improved management of land, in order to increase carbon storage or avoid greenhouse-gas emissions in landscapes worldwide.

Natural Solutions To Climate Change

Turn your city into a climate sanctuary, rally on Main Street, and other ways to make change globally by acting locally. Northeast Dispatch The Northeast Is the Fastest-Warming Region in the Lower...

How to Stop Global Warming, Solutions to Prevent Climate ...

Nuclear energy is a controversial choice as a solution to climate change. But China is showing a new way forward—ironically, with a technology developed, then shelved, by the U.S. Molten salt...

100 Practical Ways to Reverse Climate Change

The first way to prevent climate change is to move away from fossil fuels. What are the alternatives? Renewable energies like solar, wind, biomass and geothermal.

Global Warming - Solutions to solve global warming

Responding to climate change involves two possible approaches: reducing and stabilizing the levels of heat-trapping greenhouse gases in the atmosphere (“mitigation”) and/or adapting to the climate change already in the pipeline (“adaptation”).

Mitigation and Adaptation | Solutions - Climate Change ...

With climate change, farmers need science more than ever, yet public funding for research that can help them cope has been in short supply. Agroecology research—which produces the kind of long-term, literally root-deep solutions that can help farms stay viable for generations— has been particularly underfunded .

Climate Change and Agriculture | Union of Concerned Scientists

NASA is an expert in climate and Earth science. While its role is not to set climate policy or prescribe particular responses or solutions to climate change, its purview does include providing the robust scientific data needed to understand climate change and evaluating the impact of efforts to combat it.

Government Resources | Solutions - Climate Change: Vital ...

Put simply, we can't beat climate change with only the technology we have today. I believe that clean energy innovation is the solution to climate change. It is the key to unlocking new technologies and low-cost clean energy breakthroughs we need to rapidly bend the trajectory of greenhouse gas emissions.

How We Solve Climate Change | Department of Energy

Vote for leaders at all levels of government who take climate change seriously. They should commit to setting science-based targets to reduce harmful carbon emissions, implementing clear plans to reach those targets, adapting to climate change and shifting to a clean-energy economy.

Top 10 things you can do about climate change - David ...

Geoengineering - a possible solution to climate change? Steven Nelson 21 May 2012 Climate Change. The New Yorker has a real corker of a story online on possible tech fixes to combat climate change. Titled 'The Climate Fixers,' the article examines so-called 'geoengineering' efforts to halt increasing global temperatures that are a result of carbon dioxide emissions.

Geoengineering - a possible solution to climate change ...

The Solution Climate Change is driven primarily by the use of fossil fuels and secondarily by greenhouse gas emissions through deforestation, agriculture and other less prominent causes. The primary way to solve global warming is to eliminate the role of fossil fuels in modern society wherever possible.
