### Aisd Net Smurray Thermodynamics Answer Key

Solution, in chemistry, a homogenous mixture of two or more substances in relative amounts that can be varied continuously up to what is called the limit of solubility. The term solution is commonly applied to the liquid state of matter, but solutions of gases and solids are possible.

### solution | Definition & Examples | Britannica

A solution consists of a homogeneous mixture. A solution is composed of one phase (e.g., solid, liquid, gas). Particles in a solution are not visible to the naked eye. A solution does not scatter a light beam. Components of a solution cannot be separated using simple mechanical filtration.
