Modern Environment  
Every aspect of the organization that's disrupted by technology represents an opportunity to gain or lose trust. That's why leading companies are managing trust as a 360-degree challenge across technology, processes, and people. Organizations that tackle tech trust as a business-critical issue can also build brand trust, as well as competitive advantage in the marketplace.

## **How Grab is using technology to improve trust and safety**

Trust in technology has been declining for several years and is highlighted by one significant data point: What can we trust is real? Seventy-six percent worry that “false information or fake news being used as a weapon” was agreed to 76 percent of the time – that’s a 6 percent jump since 2018. In the current climate the zeitgeist is jittery.

## **In Technology We Trust(ed) | Edelman**

Photo by Franck V. on Unsplash. In my last article on Trust in AI, I wrote about how building trust in AI needs to include both 1) the people and institutions behind the technology and AI (those selling, making, using it) and 2) the technology of AI systems and solutions. But before we run off and collectively open shop for the “trust” business or lay out a blueprint and start coding trust ...
