Weathering And Erosion And Deposition Answer Key ...

Weathering—the process in which rocks on Earth’s surface are changed in form or composition—is the result of physical or chemical processes. Movements of water, ice, and wind are common causes of physical weathering. Carbonic acid and acid rain are two causes of chemical weathering. Living organisms also can cause weathering.

differentiate from weathering and erosion. The worksheet explains that weathering is "breaking" of rock or other materials, while erosion is the "moving" of rock, sand, or sediment. There are two versions of the worksheet attached. The first version instruct

Weathering And Erosion Worksheets | Teachers Pay Teachers

Weathering causes the breakup of rocks, but usually those smaller pieces begin to move by wind, water, ice, or even animals. When these smaller pieces, called pebbles, sand, or soil, begin to move by natural forces, it is called erosion. However, if you use a shovel to move rocks or soil, it is not erosion.
